

Below is an edit of a couple of emails from Brent Nibert of St. E into a description of their collection of used PPE. Please check with St. E should you have any questions about this process. Thank you.

Brent Nibert, Brent.Nibert@stelizabeth.com

All,

Attached is a picture of the set up at Edgewood for the mask disposal. This set up is in place at Edgewood, Florence, Ft. Thomas, Grant County, and Covington. Our Director of Housekeeping will take care of replacing the bag and all are locations are in place.

I spoke with our director of housekeeping who is coordinating all this huge endeavor of soiled mask and equipment. He has placed a container at each ambulance bay for use to put the bags in. This way, it's all covered and he can have a scheduled plan to pick up.

It's very important that any used equipment deposited in the containers be packaged in a (RED-BIO Hazard Bags).
